

WIZARD™ Safety Specs™

Adjustable Sport Bifocal

New Adjustable Wraparound Sport Design

Adjustable Frames, Clear UV Coated Lens and Five Diopter Sizes

Another style of the immensely popular Safety Specs, the new Adjustable Sport design features a contemporary style, along with adjustable temples while retaining the incredibly convenient bifocal reader component. These Bifocal Safety Glasses provide uncorrected vision in the upper viewing field, and correction for presbyopia (lacking ability to focus on nearby objects) in the reading segments. The flexible frame retains its shape, and provides unparalleled durability and resilience. With a range of bifocal powers, rubber earpiece inserts, and flexibility, fit and comfort are assured. There is no need to wear reading glasses underneath your safety glasses ever again. The ANSI Z87.1-2003 compliant polycarbonate lenses also include UV protection.

- Safety Specs Adjustable Sports are available in the following bifocal powers: +1.0, +1.5, +2.0, +2.5 & +3.0
- Flexible adjustable frame for resilience, durability and comfort
- Wraparound design for side protection
- 99.9% UV protection up to 380 nm
- Stylish, comfortable, can be worn at all times
- Helps prevent accidents and mistakes by improving vision
- For anyone who wears reading glasses and needs eye protection

Lens	Diopter	Stock #	UPC
